

## 2019 POLYURETHANE & PVC CATALOG

INCLUDES POLYURETHANE, PVC COLUMN WRAPS AND QUICKRAIL SYSTEMS

Style, Performance, Service. That's the Fypon® advantage.

## FYPON STYLE

Fypon is the recognized leader in polyurethane product design, innovation and molding technology. We offer a wide selection of architecturally correct styles and designs of moulding and trim. Fypon products are designed to capture the texture, patterns and deep shadow lines of classic building materials, adding a distinctive look and personality to any home.

## FYPON PERFORMANCE

Manufactured by experts in polyurethane molding technology, each Fypon product is engineered for consistent quality and long-lasting performance.

Fypon polyurethane products are low maintenance and easy to install, with no special tools or extra labor required. They are insect- and moisture-resistant, and won't warp, crack, split or rot.

## FYPON SERVICE

Building professionals trust Fypon to deliver outstanding customer service and support.

We provide:

- Drawings and marketing support for blueprints and model homes.
- An industry-first quote package program with quantity pricing tool.
- Support from Fypon experts and answers to common installation questions.
- Custom design services for historical restorations, replicas or any unique profile that fits your home or commercial application.

For more information, contact [CPS@fypon.com](mailto:CPS@fypon.com).

## UNDERSTANDING THE FYPON CATALOG AND PRODUCTS

Fypon offers a unique way to add distinction to your project with historically accurate products that bring out the best of any home.

In this catalog, you will find:

- Sizing for each part – height, width, length and projection.
- Detailed drawings.
- Part numbers.
- Inspirational images that showcase the various ways our products can be used.

## CUTTING & MILLING

Fypon polyurethane products can be cut and trimmed with standard woodworking tools, including table saws, circular saws, jig saws, band saws and miter saws. Trimming product will remove the smooth finish and create an exposed polyurethane edge. This edge must be finished with paint or stain to protect the exposed polyurethane from discoloration from the sun.

For more information on the installation and care of Fypon products, visit [fypon.com](http://fypon.com).

## CUSTOM / TAKEOFF

Fypon offers architects and builders custom design services for historical restorations, replicas and other applications. Our design experts will provide a customized takeoff plan specific to your project, complete with part numbers and list prices. # ELEVATE 2019

Humble Roots | CONFIDENT FOCUS | TIMELESS TWIST

## Celebrate style with our new products.

As homeowners focus on bringing their own personal style to life, Fypon is elevating its product portfolio. We've researched the latest home design trends to offer you an on-trend product assortment.

The Humble Roots trend is grounded in casual living and is brought to life in homes that embrace architectural authenticity. These homes often feature simple, clean design details that incorporate natural textures, dimensional patterns and a softened industrial vibe.

The Confident Focus trend is tied to visually inspired spaces with striking contrasts that have an undercurrent of excitement while still maintaining a sense of calm. Home styles that coordinate with this trend often feature vertical windows, pops of color, geometric styling and mixed materials, inside and out.

The Timeless Twist trend is centered on the reinvention of classics mixed with 21st century living. These homes often have tailored design elements that add character and feature classic patterns and deep, dramatic color palettes to bring an understated sophistication to the home.

# Window & Door Trim

## How to Use This Section

Where applicable, part numbers are shown for products with attached accessories, or other available unattached accessories are referenced or shown with the product.

## How to Order

### Door Trim & Entrance Systems

When ordering door trim, first measure the door unit to be trimmed. The unit can be measured with or without brickmould; however the brickmould is essential when using a storm door. Next, choose the desired Pilaster style and size. Finally, choose a Pediment or Crosshead that is wide enough to span the opening plus the brickmould and Pilasters. Add desired accessories to complete the look.

### Window & Door Trim Accessories

Keystones, Dentil Trim, Trim Strip and Bottom Trim accessories are available attached to standard products as fabricated products. A Keystone can also be ordered as an unattached accessory.

### Remember to Order Adhesive

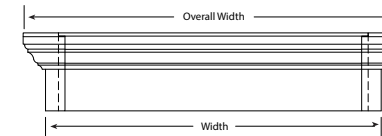

A urethane-based adhesive **must** be used on all joint surfaces. See page 252 to order Loctite® PL Premium® Adhesive.\*

\*Loctite® PL Premium® is owned by Henkel IP & Holding GmbH. Always consult the local building code authority to determine suitability of products to meet specific project requirements. Images are representative of style, actual product will vary by size.

If Pilasters are to be included as part of the opening, remember the following:

- 1) Remember to account for lighting, door bells, mailboxes or any other item that could dictate the width of the Pilaster.
- 2) Don't forget to take into account brickmould, if applicable
- 3) Breast board of Crosshead should fit over the entire width of the right and left Pilasters.

\* The last character in the part number coordinates with the Pilaster width.

**How to Order**

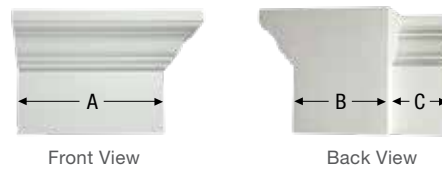

**Example**

- 1 Determine height.
- 2 Determine breast board width of Crosshead.
- 3 Select End Cap width. End Cap widths should coordinate with Pilaster or Moulding on either side of door / window. If no Moulding is used, then any End Cap can be selected.
- 4 Calculate Trimmable Crosshead; account for End Cap. Crosshead breast board width - (End Cap Back Surface X 2) = Trimmable Crosshead
- 5 Select Trimmable Crosshead.
- 6 Optional: Select Accessory Moulding / Keystone.

Additional Sizes Available

Shutters measuring 24" - 120", in 1" increments, are available at standard lead time.

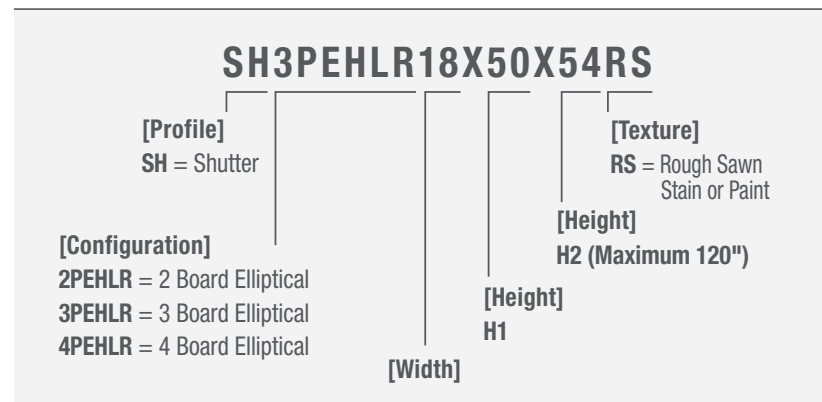

Elliptical Shutters - Board & Batten

Rough Sawn Cedar

Part Number Logic:

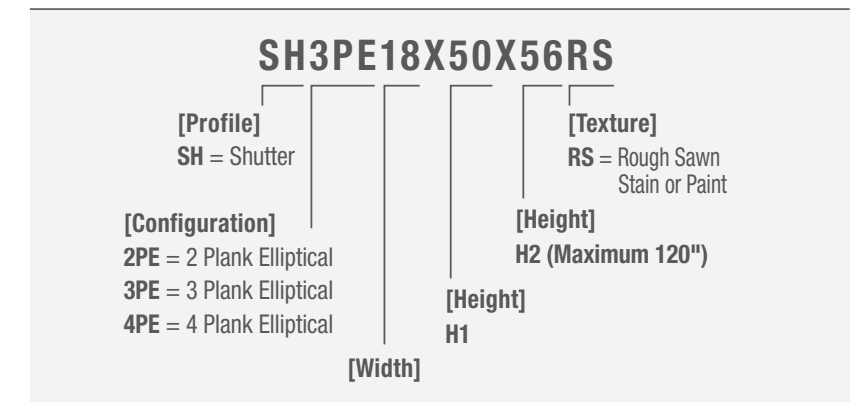

Note: Minimum height (H2) for Elliptical Board & Batten Shutters is double the width of the Shutter.  
Example: SH3PEHLR18X35X36RS - 18" = width of Shutter and 36" = height (twice the width).

Elliptical Shutters - Plank

Rough Sawn Cedar

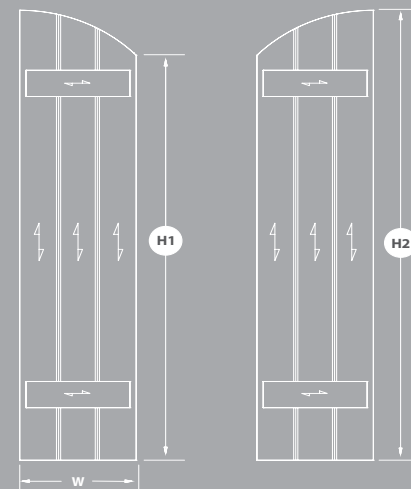

Part Number Logic:

Note: Minimum height (H2) for Elliptical Board & Batten Shutters is double the width of the Shutter.  
Example: SH3PE18X35X36RS - 18" = width of Shutter and 36" = height (twice the width).

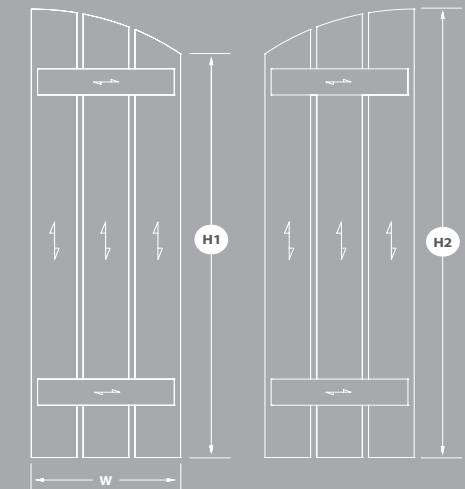

To order an Elliptical Board & Batten Shutter that complements the arch of the window, provide measurements of **H1** (in 1/4" increments) and **H2** (in 1" increments) in your part number. See drawing for specific measurement points.

**Example:**  
SH3PEHLR18X50X54RS

W H1 H2

To order an Elliptical Plank Shutter that complements the arch of the window, provide measurements of **H1** (in 1/4" increments) and **H2** (in 1" increments) in your part number. See drawing for specific measurement points.

**Example:**  
SH3PE18X50X56RS

W H1 H2

Note: If a specific radius is required to complement an elliptical shaped window, contact your customer service representative to order.

## How to Use This Section

The products in this section of the catalog are organized by moulding type. You can find a variety of products to match the aesthetics of almost any application conveniently grouped together. Where applicable, groups of Mouldings are further sorted by height, from smallest to largest.

## How to Order

### Moulding Accessories

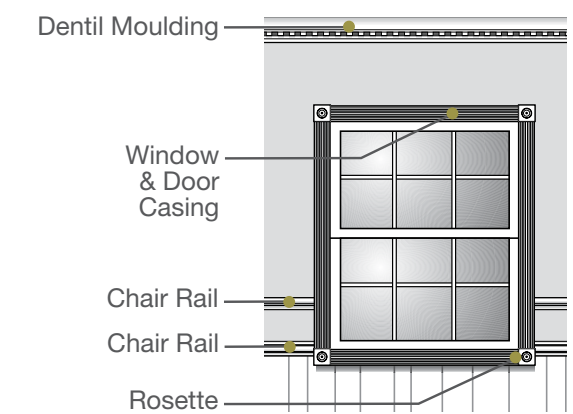

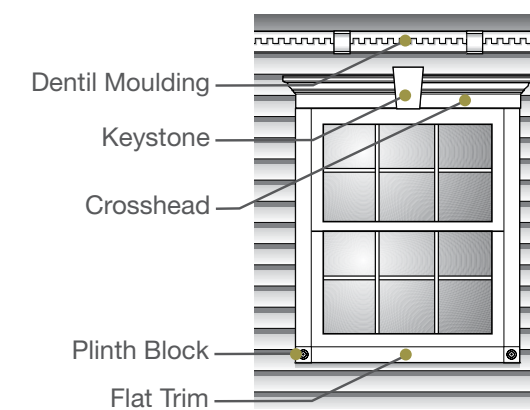

The accessories shown here are available to help make Moulding installations quick and easy. Rosettes can be used between Moulding lengths to eliminate the need for patching to create smooth seams. All Rosettes are unattached and must be ordered separately.

### Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 252 to order Loctite® PL Premium® Adhesive.\*

## Moulding Applications

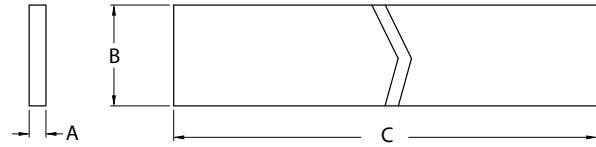

\*Loctite® PL Premium® is owned by Henkel IP & Holding GmbH.

### Change for 2019

All Flat Trim will be sold in packs of 4 instead of individually.

## How to Use This Section

The products in this section of the catalog are organized by product type. You can find a variety of products to match the aesthetics of almost any application conveniently grouped together. Where applicable, groupings of Brackets, Corbels, Rafter Tails, Beams, Dentil Blocks and other products are further sorted by height, from smallest to largest.

## How to Order

### Decorative Millwork Accessories

Some Decorative Millwork products have accessories available or are an accessory to another product. All Decorative Millwork accessories are unattached and must be ordered separately.

### Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 252 to order Loctite® PL Premium® Adhesive.\*

## Historic style for any home.

Fypon offers a diverse assortment of decorative, non-venting and functional, venting Louvers to complement most architectural home styles. Decorative Louvers feature a solid, one-piece design that does not allow air to pass through. Functional Louvers are designed to provide additional ventilation, with angled slats and screening to help protect interiors from the elements.

## How to Use This Section

The products in this section of the catalog are organized by Louver style followed by matching Trim. Where applicable, matching Keystones are referenced for each Louver and Trim piece.

## How to Order

### Functional Louvers\*

If you are ordering a Functional Louver, you should order a Louver that is approximately 2" larger than your rough opening on all sides. This will allow you to attach the Louver to the substrate through the brickmould edge.

### Louver Accessories

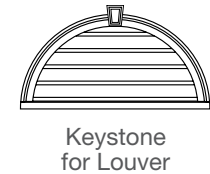

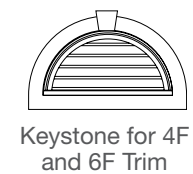

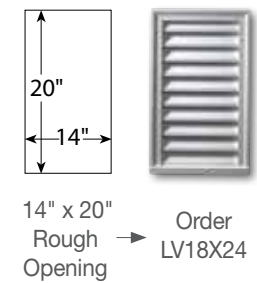

Keystones and Trim are available attached to standard products as fabricated items. Keystones and Trim can also be ordered as unattached accessories by listing the matching part number as a separate line item on your order.

### Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 252 to order Loctite® PL Premium® Adhesive.\*\*

## Louver Keystone Applications

\* Always consult the local building code authority to determine suitability of products to meet specific project requirements. Images are representative of style, actual product will vary by size.  
\*\*Loctite® PL Premium® is owned by Henkel IP & Holding GmbH.

# Balustrades, Porch Posts & Columns

## How to Order

### Balustrade Systems\*

Fypon® Smooth Balustrades are available in three systems: 5", 7" and 12". This size designates the width of the Top and Bottom Rail. In addition to these three sizes, we offer a stone-textured system, which has a 6" wide Top and Bottom Rail.

### Planning Your Layout

#### Balusters

For each Baluster, we have noted a center spacing dimension. This is the maximum center-to-center distance between Balusters that does not allow a 4" ball to pass through at any point. The number of Balusters you need can be found by dividing the rail span, in inches, by the center spacing dimension shown under each part.

**Note: When dividing gives you a fractional result, always round up to the next whole number as shown in the example.**

#### Rail Installation Kits

Each rail section (span between two Newel Posts) will require two Rail Installation Kits. Rail Installation Kits will connect both ends of one rail to a Newel Post or Column.

**Note: Fypon Rail Installation Kits will not work on stair applications. Top and Bottom Rails do not come pre-drilled.**

#### Newel Posts

Each Newel Post will require one Newel Post Installation Kit (NPK) to anchor the base of the Post, as well as any Post Tops, Balls or Trim Collars desired.

### Balustrade System Accessories

Balustrade System accessories are available to help achieve your desired look. All Balustrade accessories are unattached and must be ordered separately.

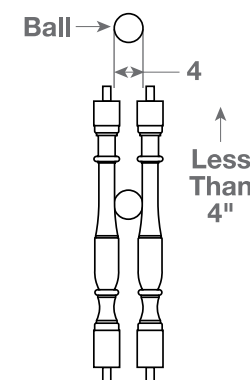

### Structural Porch Posts & Columns\*

Structural Porch Posts and Columns are reinforced and have load-bearing capacities as noted. Installation hardware is included. Simply choose the Column or Porch Post desired in a height that is equal to or slightly larger than the required height. Porch Posts and Columns can be trimmed to various lengths without impacting load rating. Be sure to order the appropriate quantity of Porch Posts and Columns to adequately support the weight of the load they will carry.

### Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 252 to order Loctite® PL Premium® Adhesive.\*\*

## Baluster Example

BAL3X20CC – Requires 5" on center spacing

Rail Span ÷ Center Spacing =  
No. of Balusters Needed

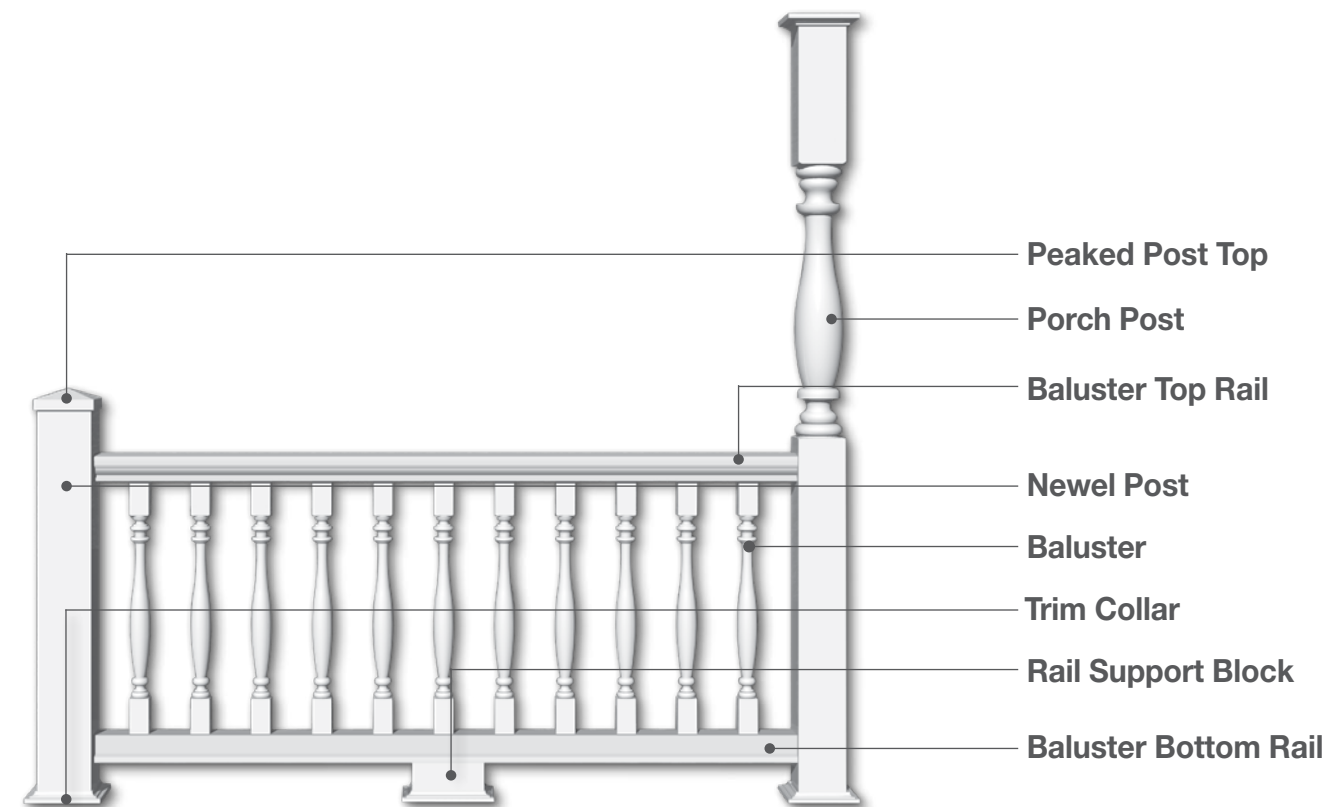

$$96" \div 5" = 19.2$$

(Round up to 20)

## Coverage with character.

Once you've met the structural requirements of your project, Fypon® PVC Column Wraps can be used to add an elegant finishing touch. Designed for easy installation around an existing structural support, Column Wraps are perfect for adding character to a new job or covering an existing, outdated design. Order any quantity of Fypon Column Wraps and they will ship in 5 business days or we will pay \$500 per order.

# PVC Column Wraps

## How to Order

### Column Wraps\*

Fypon® Column Wraps are non-structural and simply wrap around an existing treated wood post or other structural support. PremiumSelect come in a complete kit (installation kit sold separately for ProSelect) that includes shaft, cap, base, installation cleat, hardware and tube of adhesive, and installation materials. Choose between various Tapered and Square styles with a height that meets or exceeds your height requirement. Flat Panel Column Wraps can be trimmed to any height, and all other styles are trimmable from the bottom of the shaft up to 3".

### Column Wrap Accessories

Square Column Wraps come with the Traditional Cap and Base. Tapered Column Wraps come with the Craftsman Cap and Base. Six additional Cap and Base styles are available and can be ordered separately. Simply choose a style and specify the type (Square or Tapered) and the nominal size of the Column Wrap you are matching. Most of the Caps and Bases are constructed of PVC (unless otherwise noted) and ship in four separate pieces with pre-mitered corners.

### Special Order Products

PremiumSelect products shown in the catalog are available in additional sizes. Product may be modified to minimum 6" width to a 24" maximum width. The height may also be modified with a minimum height of 48" to a maximum of 144" height (maximum 108" for tapered).

### Remember to Order Adhesive

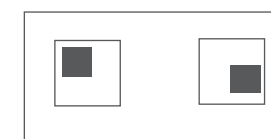

A urethane-based adhesive **must** be used on all joint surfaces. See page 252 to order Loctite® PL Premium® Adhesive.\*\*

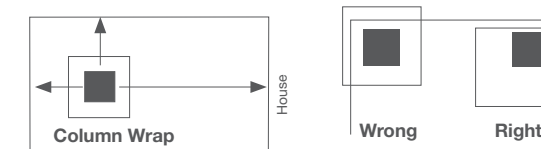

## Flexible Positioning PremiumSelect Column Wraps

Fypon Column Wraps allow for flexibility in positioning. The design features installation cleats on the exterior of the shaft for PremiumSelect providing ample room around the support post. This allows for positioning adjustments to align several columns in a row or to allow for positioning close to the porch edge. Also, because the Column Wrap does not come in contact with the structural post, the integrity of the wrap is not dependent on the support.

Before you order, you'll want to measure to make sure you have enough clear distance from the support post to the edge of the porch. The needed space is dependent on the style of column. You will need more space for tapered columns than square due to the larger base.

Flexible positioning around support post

Allow adequate distance when choosing wrap width.

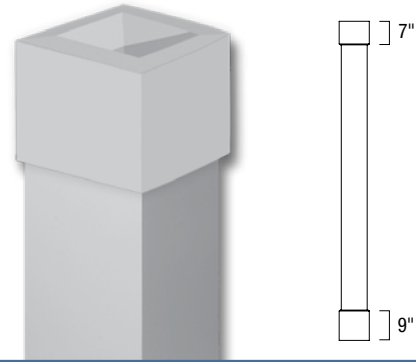

\* Always consult the local building code authority to determine suitability of products to meet specific project requirements. Images are representative of style, actual product will vary by size.

\*\* Loctite® PL Premium® is owned by Henkel IP & Holding GmbH.

## How to Use This Section

For ease of use, the product groupings in this section of the catalog are organized by size, from smallest to largest, where applicable. Each product chart includes product images, dimensional data and part numbers to help specify, source and sell Fypon® QuickRail Synthetic Railing Systems.

## How to Order

### QuickRail Systems

QuickRail Kits are available for both straight and stair applications. Each kit includes a Deluxe Top Rail, a Flat Bottom Rail, Spindles, a Crush Block<sup>^</sup>, Brackets, Bracket Covers and the necessary screws for fast installation. Rail Kits can be attached to a wall, Newel Post or Porch Post.

Note: QuickRail Stair Rail Kits cannot be attached to round columns or 45° post applications.

Plan your layout by determining the size and configuration of your porch, including any stairs. The most important step to building your order is creating an accurate layout. Check local building codes to determine minimum guardrail height, maximum rail span and structural post requirements for your area. Determine the number of Rail and Post Kits you need to accommodate your layout.

Next, choose Spindle style. Then find the part number of the Rail Kit that meets your style, length and height requirements.

Finally, determine size and style of any accessories needed to achieve the desired look.

### QuickRail System Accessories

A variety of accessories are available to create your own unique system, including Post Kits, Post Sleeves, Gate Kits, Porch Posts and Grab Rails. If you have an application where additional or unique connections are required, Bracket and Adapter Kits are sold separately. Individual components are also sold separately.

### Special Order Products

Some products shown in this catalog include special order options. This means the product is available in additional sizes or with additional accessories. Throughout this section, special order part numbers are marked with an asterisk (\*).

### Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 252 to order Loctite® PL Premium® Adhesive.\*

\* Loctite® PL Premium® is owned by Henkel IP & Holding GmbH.

\*\* Always consult the local building code authority to determine suitability of products to meet specific project requirements. Images are representative of style, actual product will vary by size.

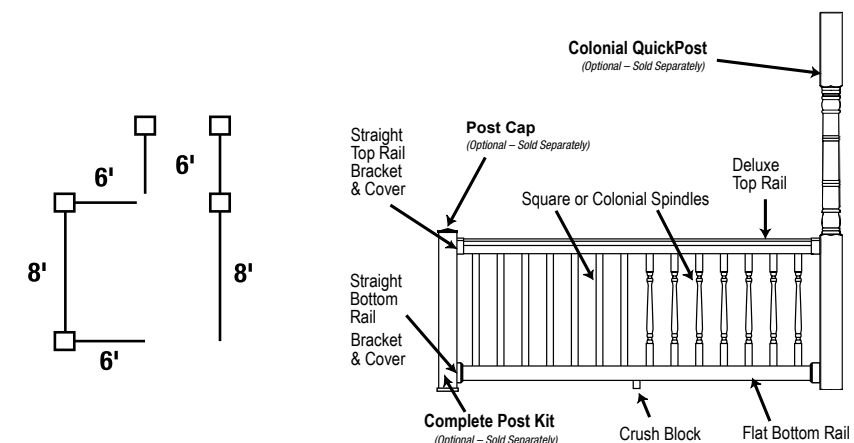

<sup>^</sup> Stair Rail System does not include crush block.

## Building Code Compliance\*\*

QuickRail System products are building code compliant when installed on structural surfaces no more than 30" above ground. The 8' and 10' Rail Kits include a Top Rail aluminum insert that must be used in any installation. The 6' Rail Kits do not require an insert. In applications above 30", only rail lengths of 10' or less mounted between our Ultra Post Kits or 4"x4" Posts with Post Sleeves are building code compliant. The Complete Post Kit with Standard Post Mount can only be installed in applications that are less than 30" above ground.

Fypon has received confirmation from ICC Evaluation Service, LLC (ICC-ES), that its QuickRail Synthetic Railing Systems comply with the provisions of the International Building Code and International Residential Code. The ICC-ES confirmation, published in evaluation report ESR-2601, will help code officials approve use of QuickRail Systems under the codes. The Fypon evaluation report is available online at [www.icc-es.org](http://www.icc-es.org).
